- - JULY 20, 1889 WHAT SHALL WE WEAR?

NEW YORK AND PARIS FASHIONS THAT HAVE FOUND FAVOR. New Fichus Which Have Been Copied from Old Pictures and Christened After

Other Historical Women. Many of the new fichus are christened with old names, some being patriotically called after Martha Washington and Dolly Madison; others are called Marie Antoinette, while others, copied from old pictures, are

FICHU TO WEAR OVER A LOW BODICE. In the cut is represented a convenient and at the same time tasteful fichu, designed to wear over a decollete dress. This simple acessory gives to the wearer a high or low

bodice as occasion simple capes are figures, and furnish an attractive drapery for bodices that are not otherwise trimmed. Adressy fichu is shown in the second cut. It is known as the Marguerite and is gauged on the shoulder. It is of soft silk to match the full front, and may be black or white, as best suits the dress over which it is to be worn. The flowers and coquille

are of lace; the high collar is made of the MARGUERITE FICHU. bright colored ottoman ribbon, as are the butterfly bows at the back and the front. Some of the new fichus are doubled squares of mull, net, or mousseline de soie, with the corners of the back rounded, the bias middle edge folded slightly, and the fronts pointed. The entire edge is then trimmed with a frill

Evening Toilets. Many evening gowns now consist only of a front breadth of considerable width, stretching far back under the arm, and of a train. These wide front breadths are generally made either of contrasting material—satin with ground either cream or light tender green, is to be made into chairs for the members of pink or maize, are worked in soft silk either the Quinnipiac club, of New Haven. This with palms or interlacing designs, which are tree was doubtless the oldest along the L. Burr.

Closer and heavier at the foot, and more scat—Atlantic coast, although the authorities difcloser and heavier at the look, and more scap tered towards the waist. They are sold in lengths of four and an eighth yards, which can lengths of four and an eighth yards, which can be, and frequently are, divided, the half be-ing enough. A beautiful design is composed Abbott, of New York, who made a careful

Crepo de Chine is a favorite material for similar treatment, save that the patterns are ranging from 1,500 to 2,000 years. all different, all elaborate, and well covering A striped lisse, sold by the yard, and useful for the same purpose, has a brocaded floral design between the stripes; and lisse is comdesign between the stripes; and lisse is com-bined in weaving with fancy grenadine, and

Fashlons in Sashes

The new black moire sashes have insertions ing horizontal, and others tapering perpendicularly. Two rows are placed horizontally with the band of sash ribbon between, and sometimes a delicate fringe at the edge. There are charming washing sashes for children's frocks to be had now, striped, in several colors, deeply fringed, and measuring about two and one-half yards long.

One of the newest forms of trimming is to embroider the petticoat in silk, with open designs, to the depth of a quarter of a yard. Others again have wide frills of lace at the

hem, with thick satin stitch embroidery in slik above. Another style is to let in lace insertion, in triple rows, above a frill of lace. with strips of the flannel showing between. Frontlets for Directoire Coats.

Collars and shirt fronts, in striped linen. Other frontlets are of pale colored silk, plaited finely, with a frill edging one side. These are for wearing with the directoire coats. and so are the pleated cravats or ties, in delicate colored silk.

Fashion Notes. Bonnets for summer wear are many of them crownless, and some of the new pate are transparent, an arrangement which is

suggestive of both coolness and lightness. French women are dressing the bair low at the back, with the categan, and for this style high bonnets would be quite inadmissible. The galons for dress trimmings are made of braid on edge, which when used look as if they had been braided on the stuff and take

the form of gimps. Boas of tulle will be worn the coming summer with evening tollets.

When green is chosen for entire gowns the grayish shades, such as reseda or vert de gris, are favored, but for accessories the yellowish greens, especially tilloul, Chartreuse or Met-

The buttons intended to be worn on directoire bodices and coats are large, the centerpainted on ivery, and bordered with pearl and paste rims. They are copied from old models, but cannot equal them, for the paste of those days was crystal.

A Good Country for Girl? There is no country like this for the proper development of girls. Tradition has no fears for them, and unlike English, German, French, or any other foreign girls, they are not met at every step by the assertion that a girl cannot do this or that, simply because she is a girl. This foolish reasoning has ad aside by good American common sense, and in consequence our girls can go anywhere and do anything that boys can do, provided it is right and proper, Given this privilege, it is not surprising that Amerithis privilege, it is not surprising that American girls distance the world in precocity,

energy and courage. Waiter-Anem, sir, you have forgotten to Broker-Oh, yes, your tip. I had forgot-ten. Buy A. H. and Q. preferred at 28 and sell at 40.—Exchange.

The Invariable Rule. The first impulse of a boy with a new

watch is to assure himself that none of its 175 parts are missing.—Jewelers' Weekly. The Truth of the Matter. Once a pleasure loving Teuton put his Sunday go to — suit on, and he started for a frolic in

the much neglected zoo.

Gazed with speechless satisfaction upon every rare attraction, and he wondered when 'twas over what he next had better do. But his moment's indecision was arrested by a

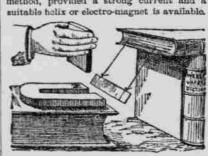

vision, and at once the other creatures Twas that gratis exhibition of conceit and inani-tion, that from poverty of language we are forced to call a "Duda."

nearly fainted, could that be a human being nearly tained, could that be a numan being so unumually shaped?
"he relied, the seven sleepers must have opened up their peepers, "Got in himmel, were's der keeper for der mongkey half es-gaped."

SUBJECTS OF INTEREST TO WIDE AWAKE MEN AND WOMEN.

An Illustrated Experiment That Shows How Motion May Be Produced by the Force of a Permanent Magnet-An Interesting Scientific Experiment. The lodestone is a familiar example of one | 2 p. m.

of the permanent magnets which Nature furnishes "ready made." Artificial magnets are Martha Washington, Dolly Madison and produced by the contact of hardened steel with magnets or by means of the voltaic current, according to Scientific American, which pronounces the latter the more effective method, provided a strong current and a

MOTION CAUSED BY PERMANENT MAGNET. Seekers after perpetual motion have en-deavored to make use of magnetism. The authority already quoted tells that vain ef-forts have been made to discover a substance which could be interposed between the magnet and its armsture and removed without his receipt for same. and released, but no such substance has ever been discovered. The lines of force may be dered. intercepted by a plate of soft iron placed between the magnet and its armature, but it re-

from, than can be recovered from the arma-The accompanying cut illustrates an experiment showing how motion may be proed by the force of a permanent magnet, An armature is suspended by threads in the field of a permanent magnet. The magnet attracts the armature slightly deflecting its suspension from a true vertical line. The introduction of a soft iron plate between the magnet and its armature intercepts the lines of force, thus releasing the armature, when It swings back under the influence of gravitation. If at this instant the iron plate is withdrawn, the magnet again acts upon the armsture, drawing it forward. Another introduction of the iron plate into the field again releases the armature, when it swings back, this time a little farther than before. By moving the iron plate in this manner synchronously with the escillations of the ar-mature, the armature may be made to swing

through a large arc. The following items appeared recently in

Popular Science News: The old oak tree at Waltham, which so excellent an authority as Professor Alexander Agassiz said was 700 years of age, has been cut down. It has been dead for some time, and stood in the path of modern improvement. Part of the venerable tree will be preserved in the library. The great oak tree at Woodbridge, which brocade, or brocade with velvet, or of a fine was cut down a few weeks ago after an explece of embroidery. Some in fine lisse, the istence reckoned at from 1,500 to 2,000 years,

mainly of empire wreaths, graduating up-wards, the edge at the foot cut out in scallops ago, said it could not be less than 2,000 years P. R. Brady, rent of hospital old, while Professor Eaton stands with these J. M. Ochoa, jury fees, assigned to

The Electric Age.

Professor Elisha Gray remarks that electrical science has made a greater advance in the Mrs. C. R. Michea, make furniseed last twenty years than in all the 6,000 historic years preceding. More is discovered in one day now than in a thousand years of the miduges. We find all sorts of work for electricity to do. We make it carry our mesof brilliant jet let in near the ends, some be- sages, drive our engine, ring our door bell and scare the burglar; we take it as a medi- C. M. Marshall, J. P. fees and purcine, light our gas with it, see by it, hear from it, talk with it, and now we are beginning to teach it to write.

> Making Bricks by Machinery. Some may smile at the idea of making bricks by machinery, but it is believed that brick making by hand will soon become a thing of the past. The stiff clay, machine made brick will be used for paving purposes, bridges, docks, tunnels and all works that nire great strength; while dry pressed rick will become the building brick of the

A Simple Scientific Experiment. Take a bottle and place a cork over the mouth. The cork must be sufficiently large to rest lightly upon it, without falling into the neck. Snap the neck of the bottle sharpfor wearing with the jacket bodies and ly with the thumb and finger, and the cork waistcoats, are much affected by some women. will fall from the bottle towards the hand will fall from the bottle towards the hand giving the blow, and not away from it as might be expected. This effect is due to the principle of inertia, the quick blow forcing, it were, the bottle away from the cork before the motion can be transmitted to the

SNAP THE NECK OF THE BOTTLE. Few persons will be able to perform this the instinctive fear of breaking the bottle or injuring the fingers prevents one from giv-ing a sufficiently powerful blow, in spite of all efforts to the contrary.

Australian Rabbit Pest. It is stated that M. Pasteur's plan of exterminating the rabbits by inoculation with transmittable virus has proved to be a failure in Australia. The reward of \$100,000 offered by the New South Wales government for an effective mode of destroying the ro-

The production of wood in India, central Asia and China is estimated at \$00,000,000 nds. Australia and New Zealand possess 75,000,000 sheep, producing 200,000,000 pounds of wool, worth \$114,160,000. La Plata possesses 100,000,000 sheep, producing 50,000 tons of wool, worth \$4,840,000. Europe possesses 200,000,000 sheep, yielding 400,000,000 pounds

There is so long a list of applicants for ad- 5, 1889. mission to the London Athenæum club that the last man elected has been waiting for sixteen years, and fifteen years is the average time that a name remains on the lists there, unless it is so distinguished that it is taken up out of its order. Three or four years is said to be a moderate time to wait for a chance of admission to many other clubs in London.

A woman in New York has invented an ingenious and unique bath for infants. It is made of pure rubber on strong cloth, and is folded over a pretty frame of bamboo, which can be enlarged as the child grows older. At the bottom is a hard rubber faucet for the water outlet. One end is furnished with convenient pockets for tailet articles, and the other end with a clothes and towel bracket. It is raised sufficiently from the floor to make it convenient for the mother to sit in her chair while bathing the baby.

Miss Houler-And pray tell me truly, professor, what do you think of my voice?

Professor—Excusez moi, mademoiselle. I Hill taken up and found as follows: positiveelee could not be so incourteous .-
